

Oak Hill Elementary School - St. Cloud, MN

The St. Cloud School District chose Winkelman Building Corporation to construct Oak Hill Elementary School, a 92,000 square foot facility that serves 850 students in grades K through 6. The building is constructed of masonry exterior walls with metal joist and a deck roofing system and features demountable partition classroom walls. The school's design includes classrooms, gymnasium, cafeteria, media center and administrative offices.

Architect: Armstrong, Torseth, Skold & Rydeen, Inc.
