

St. Cloud Cold Storage - Waite Park, MN

St. Cloud Cold Storage building #7 is a 80,400 square foot zero degree Fahrenheit freezer facility. The building utilizes a Behlen pre-engineered metal building structural frame system with a 24 gauge Galvalume standing seam roof. The exterior freezer walls consist of 6" thick EPS Energy-Lok insulated wall panels. The loading dock and mechanical mezzanine are constructed of concrete block and pre-cast concrete floor and roof plank with a rubber membrane roof.
