

Manea's Meats—Sauk Rapids, MN

Due to relocation, Manea's built a new state-of-the-art meat processing facility and retail store. The exterior of the 11,940 sf building features a mix of light colored brick and EFIS with an EPDM roofing system. The interior features a number of maintenance-free items including installation of curbs around the coolers and display cases to reduce damage from carts, special sloped floors with drains for the meat production area and imbedded coolers and freezers to reduce lifting.
